

## Solution

# Contactless Solutions for Order and Pay

Whether Dine-In Or Off-Premise, CardFree Offers Contactless, Mobile Solutions for Order and Pay

CardFree's **Ordering** platform gives guests the ability to order at the table, in the drive-thru, curbside, takeout and delivery from mobile responsive sites or native apps

- **Order@Table** allows guests to scan a QR code at the table to view the menu, place orders and pay with a credit card, gift card, Apple Pay or Google Pay
- **Online Ordering** provides a turnkey solution for Web and Native App ordering. It delivers consistent UI/UX across consumer interfaces and supports complex menus with unlimited items, modifiers and combos

CardFree's **Mobile Pay** platform allows guests to enjoy the convenience and safety of contactless payments at the table, in the drive-thru and for phoned-in takeout orders

- With **Text-to-Pay**, guests can receive a text message with a link to pay for their phoned-in order and notify staff that "I'm Here" for curbside pickup when they arrive
- With **Pay@Table**, guests simply scan a QR code on their receipt or at the table to view, split and pay for their itemized bill with credit card, gift card, Apple Pay or Google Pay
- With **Pay@Drive-Thru**, guests can pay for orders using their mobile device before reaching the pick-up window, shaving valuable seconds off speed of service

## Guest Benefits:

- Convenient and secure contactless solution to order and pay
- No mobile app required
- Pay with credit card, gift card, or digital wallets including Apple Pay and Google Pay
- No need to give card credentials over the phone
- Order and pay without waiting on a server
- Split the check multiple ways
- Curbside notifications for online and phoned in orders

## Restaurant Benefits:

- No new hardware or mobile app required
- Turnkey solutions can be deployed in weeks
- Pre-integrated with multiple restaurant POS systems, delivery providers and other third-party services
- End-to-end solution: other CardFree services such as Loyalty and Offers can be added
- PCI level 1 compliant
- Increase speed of service at the table and in the drive-thru
- Mitigate chargebacks and downgrades from keyed-in card payments
- Increase average ticket from upsell/cross-sell, modifiers, and add-ons
- Decrease reliance on expensive 3rd Party Delivery
