Split Payments can help you drive new and repeat business.

Quadpay's omnichannel payment solution allows customers more control over their spending by giving them the option to pay over time via simple, interest-free installments.

Merchants can integrate Quadpay online with just a few lines of code. For in-store sales, there is zero IT support required. If you accept Visa today, you can accept Quadpay.

“Buy now, pay later” made easy:

-  Supports Apple Pay[®], Google Pay[®] and manual key-in
-  Simple online integration
-  No in-store integration or changes required to existing NFC-enabled POS systems
-  Supports existing order management systems, fulfillment and refund processes
