Many small merchants think only larger merchants have security breaches. But for hackers, small businesses are also significant targets—90% of all data breaches impact them.¹

Over the last 10 years, cybercrime trends have changed dramatically—from individuals using skimming devices that cost less than $200 to a more sophisticated cybercrime ecosystem leveraging malware.

Malware is malicious software used to disrupt computer operations, gather sensitive information, or gain access to private computer systems. Malware has increased at frightening growth rates—over 300% in last 2 years.²

TransArmor is a multi-layered security and compliance solution that helps merchants to protect their data, their customers and their brand.
TransArmor® Solution protects payment card data from the moment a card is swiped throughout the entire transaction process, incorporating several security and compliance products into one multi-layered, comprehensive solution. Now, you can operate your business with confidence, knowing your customers’ information is safeguarded.

**Added Protection**

**Data protection**
The latest encryption and tokenization technology that helps protect cardholder data in a merchant’s payment system from the moment a card is swiped.3

**POS software monitor**
Downloadable software helps to monitor and helps protect point-of-sale equipment.

**POS hardware monitor**
Solution that helps monitor equipment for possible tampering.

**EMV® enablement**
EMV chip card payment acceptance to help prevent fraudulent card use as part of overall security protection.3,4

**Maintain Compliance**

**PCI Rapid Comply®**
A simple, online Payment Card Industry (PCI) compliance questionnaire wizard that makes becoming compliant faster and easier.

**Security score**
An at-a-glance benchmark for data security and risk reduction.

**Minimize Your Liabilities**

**Liability waiver**
Up to $100,000 for card association costs in the event of a data breach.5

**Support experts**
An additional level of client service expertise to address security questions or concerns.
