

Reporting and Analytics

powered by ClientLine Enterprise

Consolidated reporting to track, analyze and monitor all payment transactions.

As the payment landscape becomes increasingly complex, it is more important than ever for merchants to have a single, global data and reporting platform to provide a consistent experience regardless of country, region and method of payment.

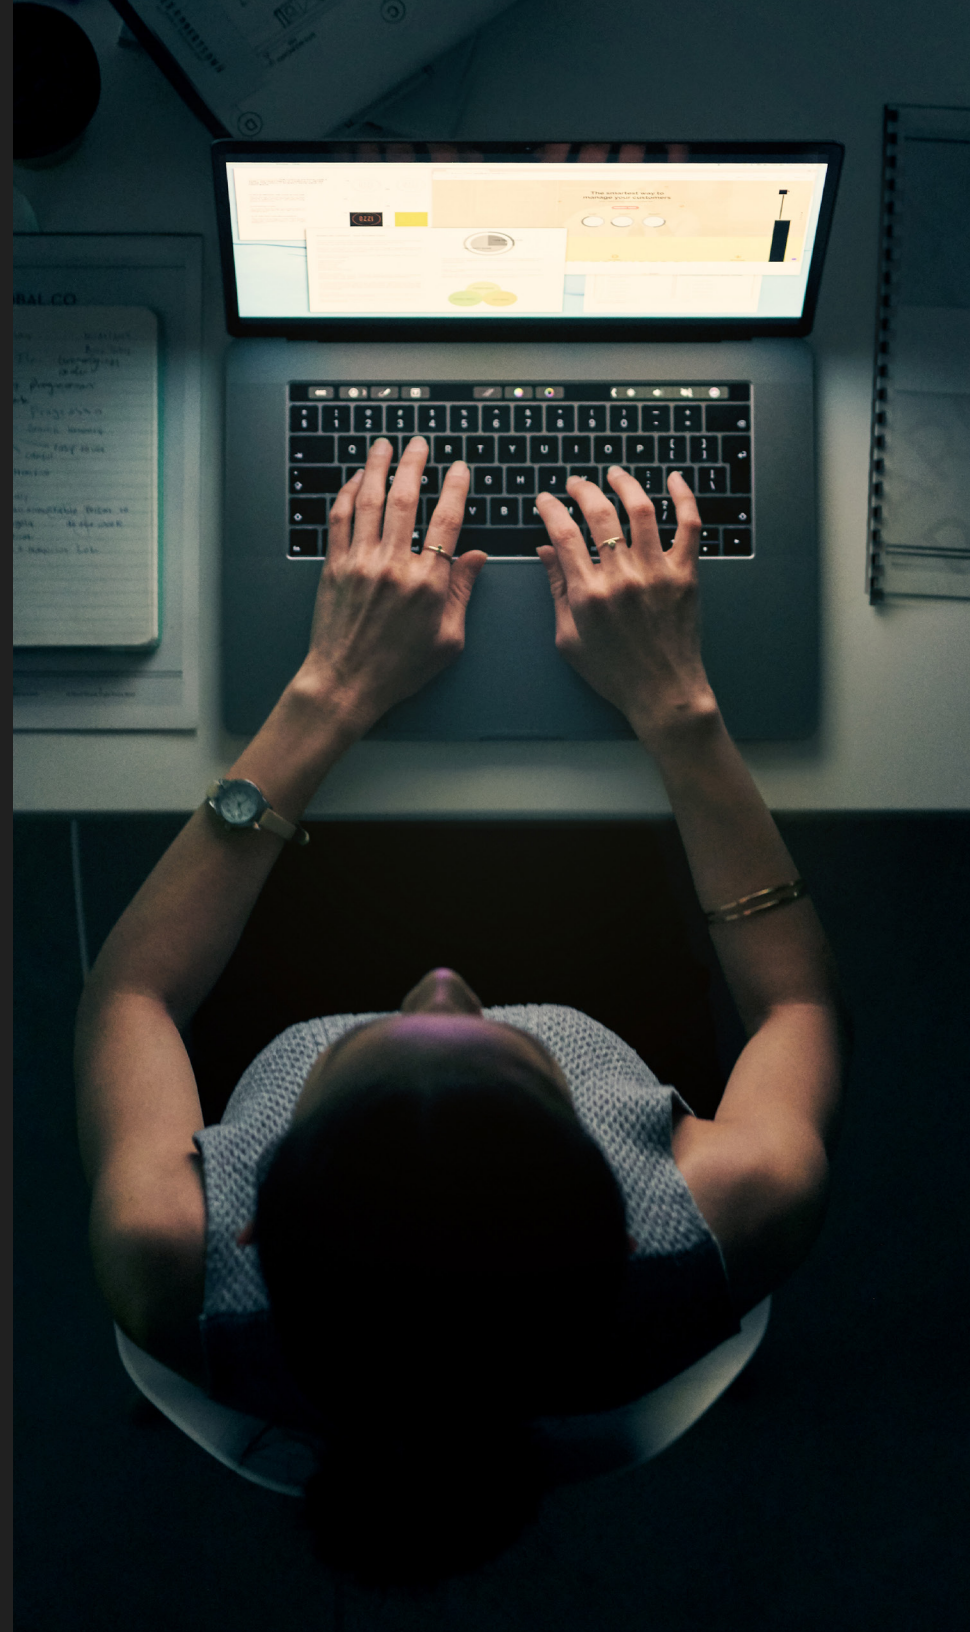

Save time and effort with a consolidated reporting solution that supports all payment transactions processed by Fiserv and provides a combined platform view for multi-acquirer and multi-platform processing.

How This Benefits You

Reduce fraud risk and expense with automated alerts and real-time monitoring of potential issues or areas to investigate.

Save on development costs and the need for IT resources with a simple integration with merchant reporting systems.

Gain better visibility into interchange and fees at the transaction or network level to better understand and manage acceptance costs.

Additional Features

-  Agile cloud-based architecture
-  Download/file options conducive to the client's environment
-  Single global omnichannel commerce solution
-  Customized reporting through an enhanced User Interface

Comprehensive Transaction Management

Access and manage business-critical data through a one-stop platform

Data sharing and data transmission solutions allows data for reconciliation to be available to the user as soon as it is available in the database

Track and reconcile transactions through the life cycle and determine dispute outcomes

Real-Time Monitoring and Automated Alerts

Trending for issuer, network and declines

Alerts for abnormal activity that impacts a merchant's costs and operations

MID/location-based alerting

Customized lobby to quickly manage and view key metrics and processing information

More Powerful Benchmarking and Insights

Compare your data over periods of time

Compare your data to other similar clients' data
